

# What's New in Windows Vista

Dave**the**pcguy.com

In this 90 minute seminar I will discuss the new “look and feel” that Microsoft Windows Vista offers and how things have changed from Windows XP. Some of the topics to be discussed are the desktop search features, the Windows Live Gallery Sidebar, connecting to a wireless network and parental controls. I will give step-by-step demonstrations on how to better utilize some of the features that Vista has to offer and will have allotted time for Q&A.
